Austin, TX | 254-213-8667 | brianmmccune@gmail.com | [www.linkedin.com/in/mccuneb](http://www.linkedin.com/in/mccuneb) | <https://github.com/Brian4755> | <https://brianportfolio.netlify.app/>

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Python

**Libraries and Frameworks:** ReactJS, ExpressJS, Django, NodeJS

**Databases and other:** HTML5, CSS, MongoDB, RESTful API, Elasticsearch, NoSQL, Docker

## PROJECTS

---

**NavigateEDU - [GitHub](#) | [App](#) - ReactJS, ExpressJS, HTML, CSS, JavaScript, Bootstrap, Material UI, Figma**

*An application stressing digital equity where users can learn about the web and online interfaces*

- Developed a 70 hour full-stack application over a 5-day hackathon with UI/UX designers and developers.
- Implemented an API language translation using Postman throughout the lessons and homepage.
- Replicated color palettes and design patterns of almost 100% accuracy from Figma ideas created by designers.
- Avoided overlaps and merge conflicts with over 160 commits amongst other developers by using Git version control systems and working on various branches.
- Created various hooks such as useState, useEffect to display a carousel lessons navigation.

**TFT Cheatsheet - [GitHub](#) | [App](#) - HTML, CSS, JavaScript, EJS, mongoDB/mongoose**

*A forum and guide for the game "Teamfight Tactics" where users can read and create reviews*

- Utilized a Node.js backend that incorporates all create, read, update, delete (CRUD) operations that are user specific.
- Assembled designed UI manually with complex CSS and vanilla JavaScript.
- Created a database of over 200 stored users using Google OAuth account creation with the use of Azure and MongoDB

**Fitness Bros - [GitHub](#) | [App](#) - ReactJS, HTML, CSS, JavaScript, EJS, mongoDB/mongoose**

*Fitness website where users can track their exercises and diet through their profile*

- Developed a full-stack 7-day application with a complex back-end working with 3 software engineers.
- Built in multiple APIs that tracks 1000's of exercises and meals which users can add to keep track of their progress.
- Planned 100% of the UI design and state management of the application using Trello and Whimsical.
- Utilized Material UI and Bootstrap to showcase NavBar and profile creation effects.

## EXPERIENCE

---

**Full-Stack Developer/Web Developer || [Jack's Barber Shop](#)**

*Manor, TX. 08/2022 - present*

- Increased overall traffic by 15% by developing a ReactJS web-application showcasing the company's skills.
- Boosted customer satisfaction ratings by 20% by promoting the company's social media platforms within their marketing website.
- Included screen size adaptability and mobile friendly user interaction with visually appealing UI, along with google API implementation.

**Compounding Pharmacy Technician || Tarrytown Pharmacy**

*Austin, TX. 05/2019 - 06/2022*

- Managed drug inventory to ensure 100% stock availability of essential drugs.
- Taught several junior pharmacy technicians who became long time employees for the company.
- Worked directly with the pharmacist to compound and package over 200 medications daily.

**Vice President/Volunteer Chair || Longhorn Pre-Pharmacy Association**

*Austin, TX. 08/2015 - 05/2019*

- Worked as a team to lead a future pharmacists group of over 150 members.
- Hosted/Attended to 100+ volunteer events accumulating over 600 hours of community service.
- Spoke bi-weekly in front of over 130 students promoting events.

## EDUCATION

---

**General Assembly**

*Remote, Certificate: 08/2022*

**University of Texas at Austin, Bachelor's of Science in Chemistry**

*Austin, TX, Graduated: 05/2019*
